

Geoff Tuttle at the Brickhouse Gallery

Yet another of Sacto's buried treasures will be unearthed this month. Installation artist Geoff Tuttle will be presenting *control_alt_delete* at the Brickhouse Gallery. Tuttle's resume boasts everything from set design for the film *The American Astronaut* to a BFA from Stanford. His large-scale installations have included dirigibles, electricity, sound, and hay. In short, it's anyone's guess as to what we can expect this time around. Installation work of this caliber doesn't often show in Sacramento, and as such this show is a must see.
